COURTESY, & PUBLIC ACCESS**

TELEPHONE SOLUTIONS

BUILT TO LAST

THE COMPANY

For over 70 years, Communication Equipment & Engineering Company (CEECO) has been serving the private and public business sectors in delivering high quality telephone technology. From turnkey telephone solutions, to kits and parts designed for integration with third-party equipment, to custom engineering, CEECO is dedicated to meeting the emergency, security, courtesy, and public access telephone requirements for a broad range of industries. As a recognized leader in delivering innovative telephone solutions, CEECO has achieved many industry firsts including:

- First Steel Braille Keypad
- First Inmate Telephone Control System
- First Voice Intercept Announcer
- First Mini Stainless Steel Wall Phone

“For ten years, CEECO has provided high-quality telephone equipment and services to the San Francisco International Airport. One of the primary reasons we use CEECO telephones is quality. Its products are not only attractive and easy to maintain, but are also built to last, which significantly lowers our cost of ownership.”

Jeff Farrington, Manager of Telecommunications Operations
San Francisco International Airport

All CEECO products are designed for longevity for two reasons – to withstand abuse inflicted by nature or people, and to protect its customer’s investment. Whether it’s an elevator phone, a credit card phone in an airport, an emergency roadside phone, or a phone in a kiosk, high quality design and manufacturing is a number one priority for CEECO. In fact, high quality is a CEECO trademark. Its products are UL and FCC approved, ADA compliant, and are painstakingly tested for endurance, safety, and where appropriate, weather resistance.

INDUSTRY FOCUSED SOLUTIONS

CEECO products are meeting the emergency, security, courtesy, and public telephone requirements for a worldwide customer base. Its telephone solutions serve many industry segments including:

- Telecommunications
- Education
- Healthcare
- Transportation
- Travel
- Hotels/Resorts
- Recreation
- Correctional
- Government
- Financial
- ... any public facility

CEECO products are installed in major hotels, famous theme parks, high-volume municipal airports, large universities, hospitals, prisons, parking garages, banks, parks, and many other private and public facilities.

Regardless of the industry or application, CEECO delivers high-quality, cost-effective products and services tailored to market requirements.

- Kent State University’s campus is safer with strategically placed CEECO security phones.
- San Francisco Airport reduced telephone replacement/repair costs by over 200 percent in the first year by installing stainless steel phones from CEECO.
- Comsat Mobile Communications serves cruise ship passengers and staff with custom credit card telephones from CEECO.
- CEECO supplied hundreds of telephones to Guantanamo Bay Naval Station to meet urgent communication requirements.

Custom CEECO credit card telephones ease communications for cruise ship passengers.

CUSTOMER SERVICE & SUPPORT

CEECO has built its reputation on quality both in products and service and support. Its cohesive engineering, manufacturing, and support staff are located in the same facility greatly enhancing CEECO’s ability to deliver timely resolution to customer issues. CEECO applies its product customization philosophy to service and support offering technical consulting to its customers beyond the scope of its own products. Its technical expertise can be leveraged to ensure the smooth integration of CEECO products with other components to optimize the complete communication solution.

CEECO is committed to providing superior products and support – a commitment that is backed by over 70 years of experience.

CEECO VALUE ADD

- ▲ Over 70 years of success
- ▲ Patented telephone technology
- ▲ Worldwide customer base
- ▲ Industry leader in custom telephone design and manufacturing
- ▲ Largest supplier of telephone kits and related equipment
- ▲ Most durable, abuse and vandal resistant telephones available
- ▲ Technical diversity serving broad range of industries
- ▲ Complete personalization to meet customer branding requirements
- ▲ Expert customer service and support
- ▲ Unprecedented product quality and reliability for a lower cost of ownership

“CEECO public access telephones have helped to minimize our telephone vandalism problems at Columbia University, and have lowered our replacement and repair costs due to their reliability and rugged design.”

Patrick Thompson, Manager, Columbia University

TELEPHONE SOLUTIONS ENGINEERED FOR FLEXIBILITY

One of CEECO’s strengths is its ability to understand the unique requirements of its customers and the markets they serve. This understanding has allowed CEECO to develop a family of products that can be off-the-shelf solutions, customized, or built-from-scratch to meet unique customer or application requirements. In addition to complete telephone solutions, CEECO manufactures and supplies related telephone equipment such as hookswitches, dials, and keypads.

A customized CEECO telephone is housed in the Washington Monument. The requirement – build a custom phone that could be installed in an odd shaped space – altering the Monument was not an option.

Whether it’s a call to the office or an elevator emergency, CEECO telephone technology meets the needs and specifications of a broad range of applications.
