**TELEPHONE SOLUTIONS  
BUILT TO LAST**

CEEEO telephone solutions are designed to offer outstanding quality for long term dependability, while providing cost saving solutions.

**BUILT TO LAST**

## LIFELINE MODELS

**Elevators and more.** Our flush mount panel telephones are designed for areas that may depend on emergency communications. Handsfree operation offers easy access for critical communication. Panels are stainless steel and include a braille emergency plate, LED indicators provide visual operation indication. Optional smart features available for these models. Also offered for low power locations.

**A mounting option.** Several of our stainless steel panel models can be mounted in our overhang enclosure. The HOB enclosure is a solution for wall mounting our stainless steel panels. These emergency models offer a variety of communication solutions. Colors offered are red and black. All components are designed for protection from environmental conditions.

**A closed environment.** Our magnetic handset models offer a communication solution for areas with high debris or corrosion exposure. Our magnetic model also offers reliable desktop communication for public locations. Models offered in auto dial and standard operation.

**Prison visitation and 2-way communication.** Our 350 model fits limited space requirements for talk battery or power supply communication. Our tough 350 model is fabricated in stainless steel and is equipped with a marine chrome quality cradle and armored cord lexan handset. A proven communication device in rugged environments.

## MARINER MODELS

**Emergency outdoor communication.** Our WPP-531 models offer reliable communication in any weather conditions. The weatherproof housings are constructed of heavy gauge cast aluminum, panels are stainless steel and components are protected from the elements. Clasp, pushbutton and locking housings offered in red, black, and yellow with EMERGENCY or TELEPHONE on the door. Technology options available.

**From industrial to mother nature.** Our weatherproof telephones offer dependable communication. Our WPP-331 models provide standard, auto dial, ring-down or smart communication. Manufactured with cast aluminum housing, stainless steel panel, marine quality chrome hookswitch and keypad, and armored cord lexan handset. Options include pole mounting, spring loaded door, and choice of housing color.

**When visibility counts.** Our WPP-531 models are offered with an optional blue strobe light. Popular from education campuses to public facilities, the strobe light gives extra attention to an emergency situation. Our waterproof strobe lights are offered in two sizes with a variety of colors and options.

**A weather resistant option.** Our HOB housings offer an alternative for overhang locations. These housings require minimal protection from the elements. Our 311 or 511 panels are designed for the HOB enclosures. Offering a wall mounted solution for all of our 311 and 511 speakerphone or handset panel models. **HOB housed telephones may not be mounted directly in the elements. They must be under an overhang.**

## PUBLIC DEFENDER MODELS

**An industrial grade speakerphone.** A desired model for all vandal subjected areas. Our prison customers can attest to that! Offered in our large or small wall mount housings. Available with keypad or auto dial operation, selectable tone or pulse dialing, automatic disconnect when called party disconnects (cannot be left off-hook), conversational timers and optional emergency features. Low power models available.

**A designated connection.** Our multi-dialing telephones offer easy, convenient dialing. Each button contains a preprogrammed number and includes an area for instructions. Popular from kiosks to building complexes. Our multi-dialing telephones are offered in a variety of shapes and sizes. All models are constructed of stainless steel and are equipped with vandal deterrent components.

**Multiple auto dialing.** Designed to withstand abuse, our full size 301 model fits standard "1" style telephone booth footprints offering easy installation. Ideal for public locations requiring specific communication. Each pushbutton offers a location for a preprogrammed number to be dialed. Buttons can be black or red and inscribed with custom wording; "EMER", "CALL" etc.

**Flush mount communication.** We offer a variety of panel sizes to fit most telephone applications. If we cannot fit your existing requirement, we can customize a solution. All panels offered in auto dial, ring-down, standard, and smart technology. Custom size, technology, aesthetics and accessories are always available at CEECO.

**Our most popular model.** Our 321 models are suitable for all public locations. Offered in stainless steel or blue epoxy painted steel. The 321 models are wall mount telephones. The backplate is mounted to the wall and the housing is then secured to the backplate with tamper resistant hardware. Handsets are equipped with a steel lanyard to prevent handset damage and removal. The 321 models are offered in Standard, Smart, Supersmart, Autodialer and Ring-down versions.

**A payphone replacement.** The 301 models are mounted with standard type 1 mounting for compatible installation to replace existing payphones. Built for abuse, the 301 is a rugged stainless steel or blue epoxy painted steel housing, equipped with high security brackets, tamper-proof mounting, armored cord steel lanyard lexan handsets, and marine quality chrome keypad, hookswitch, instruction frame and swivel. The 301 models are offered in Standard, Auto dial, Ring-down, and Smart versions.

**When bigger is better.** Our 561 handsfree models are a complete package for flush mount installation. The larger 561 panels are stainless steel and include a rough-in mounting box and optional instruction card window. Designed for easy installation. Available with keypad or auto dial operation, and optional emergency features.

## BUILDING BLOCKS

**Build your own.** CEECO provides telephone kits adaptable to the customer's existing equipment or custom projects.

Replacement parts are also available, further reducing the cost of ownership and offering longer life span.
